

C1
Cont 32. (Amended) The method according to claim 31, wherein said bacteria are [is
a] drug resistant [bacteria].

C2 34. (Amended) The method according to claim [1] 31, wherein the bacteriophage
is obtained by [anti-HDS selection (serial passage)] serial passage of a mutagenized or
non-mutagenized bacteriophage which is able to survive in an animal for a longer period
than a wild-type bacteriophage of the same strain.

Claim 35, line 1, after "bacteria" delete "is" and insert --are--.

Claim 36, line 1, after "bacteria" delete "is" and insert --are--.

C3 37. (Amended) The method according to claim 31, wherein the bacteriophage is
administered by way of an aerosol to [an animal's] said patient's lungs.

39. (Amended) The method according to claim [28] 38, wherein the bacteriophage
is administered at a dosage of about 10^{12} pfu/kg/day.

C4 40. (Amended) A method for treating an infectious disease caused by [a] bacteria,
comprising administering to [an animal] a human in need of such treatment an antibiotic
and/or a chemotherapeutic agent in combination with a bacteriophage specific for said
bacteria, wherein said antibiotic and/or a chemotherapeutic agent in combination with a
bacteriophage is in a dosage effective to substantially eliminate the bacteria, wherein said
